# CONSTRUCTION OF BODRUM GÜLLÜK BULK LOADING PORT TURKEY

Sector : Port Construction  
Completion Date : 2006  
Employer : Republic of Turkey Ministry of  
Transport, Maritime Affairs  
Communications

## Scope of Works:

Design, Construction and Operation of Gulluk Harbour for Feldspat mine shipping for export. The capacity of harbour will be 6.000.000 tons/year and length of loading pier is 345 meters where four ships can approach at the same time. There will be no enviromental pollution during the operation period due to high technology purification systems and fire fighting systems. The project also contains administrative building, workshop, canteen, security building, weight bridge and water storage tanks. Gulluk Harbour will be one the most modern harbours of Turkey with the high technology and facilities.
